DETAILED ACTION

Response to Amendment

1. The amendment filed 5/31/05 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: " an engine", "a gas engine" "engine oil" as recited in new claims 17-19,23.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1,4-6,10-23, are rejected under 35 U.S.C. 102(b) as being anticipated by Arutunoff (US 1,531,724).

Regarding claim 1, Arutunoff (see figs. 1-6) discloses an electric motor assembly, comprising: a fluid circulation circuit: a housing (1)having a cavity (30,31) that is fluidly connected to said fluid circulation circuit; an electric motor having at least one electric motor component (4) disposed in the cavity a thermally conductive fluid for circulation through the cavity to substantially submerge said at least one electric motor component.

Regarding claim 4, Arutunoff discloses the housing further comprises a partition (32) and the electric motor comprises a rotor (5), a stator iron, and a stator winding (18), the partition separating the rotor from the stator iron and the stator winding, wherein a space between an exterior portion of the partition and the housing (1) forms the cavity, and wherein the thermally conductive fluid fills the cavity to substantially submerge at least one of the stator iron and the stator winding without contacting the rotor.

Regarding claim 5, Arutunoff discloses thermally conductive fluid is a dielectric fluid.

Regarding claim 6, Arutunoff discloses the dielectric fluid is a dielectric oil.

Regarding claim 10, Arutunoff discloses the housing has a fluid inlet and a fluid outlet the system further comprises: a fluid pump that circulates the dielectric fluid through the fluid inlet into the cavity and out of the fluid outlet; and a fluid reservoir that houses excess dielectric fluid.

Regarding claim 11, Arutunoff discloses comprising a heat exchanger in communication with the dielectric fluid.

Regarding claim 12, Arutunoff discloses a filter connected upstream of the housing to filter particles from the dielectric fluid.

Regarding claim 13, Arutunoff discloses said at least one electric motor component includes one of a rotor and a rotor bearing (33) substantially submerged in said thermally conductive fluid.

Regarding claim 14, Arutunoff discloses dielectric fluid is in fluid communication with a bearing which supports a rotor shaft.

Regarding claim 15, Arutunoff discloses said at least one electric motor component comprises a rotor rotatable about a rotor axis, said rotor rotatable while substantially submerged in said dielectric fluid to circulate said dielectric fluid through said cavity.

Regarding claim 16, Arutunoff discloses said fluid circulation circuit includes a portion that is outside of said housing.

Regarding claims 17-19, the are new subject matter.

Regarding claims 20-23, the method therein is given by the apparatus of Arutunoff.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
